

The Commando Program

KLEPPER

FALTBOOTE

THE COMMANDO PROGRAM

The complete, established folding boat program which offers noiseless and undetectable movement of 1 or 2 persons with all supplies, equipment, rations and weaponry (total load of up to 450 kg or 990 lbs possible) in all types of water and most types of weather over a range of 50 km (30 miles) per day. The Commando program is designed around the famous "AERIUS" model and features:

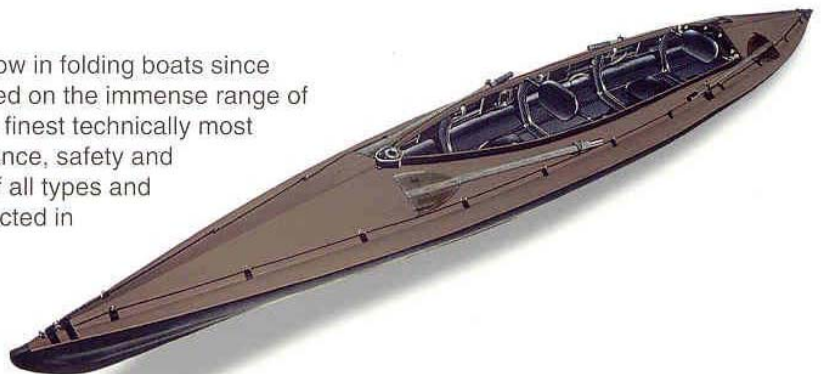

- Proven and mature Boat System handcrafted from the finest and most durable materials, completely standardized between Navy, Army, Marines, Air Force and all NATO and SEATO members as well associated friendly governments.
- Official NATO designation code number C-2810, U.S. CAGE number 8W671 (this is the developmentline of the "NATO Mark 13" from which operation manuals were written as early as 1955).
- Simple, easy and fast assembly of boat based on part identification using two-color code and seven numbers, as well as night markings, requiring high school reading capability for instructions on first assembly only.
- Number-Based Optical NATO Spare Part Identification and Order System, standardized for all NATO forces and effective part supply.
- Established Field Support System (War Chest) which allows to keep any number of units in operating condition, far away from base.
- Delivery and Customer Service which supports the specific needs of military users.

COMMANDO

Length overall.....	520 cm (17 ft.)
Beam.....	87 cm (34 in.)
Weight.....	36 kg (80 lbs)
(basic boat)	
Water displacement.....	500 l (132 USgal)
Range of operation/day.....	50 km (30 mls)
Speed.....	8 km/h (5 mls/h)
Carrying capacity	450 kg (990 lbs)
(2 persons plus load)	
In-boat load volume	1 m ³ (35.3 cft)
(in addition to operators)	

OUR COMPANY AND PHILOSOPHY

Company with the greatest experience and know-how in folding boats since 1907, located in Rosenheim - South Germany. Based on the immense range of use of folding boats each boat is handcrafted of the finest technically most advanced materials to assure outstanding performance, safety and durability. Constant direct contact with boat users of all types and great engineering and development efforts are reflected in the performance of the boat.
