

NovAtel Post-Contractual Support (PCS)

February 8, 2010

Effective January 1, 2010, PCS will be included in the price of all NovAtel receivers, for the life of the product. Please note that PCS has not gone away; rather, changes in accounting standards now allow us to include it in the purchase price.

The change to this policy means that there is no longer a requirement for our customers to purchase annual PCS subscriptions for NovAtel receivers and firmware.

Note that this change does not apply to Waypoint software, which still requires current PCS subscriptions for sustaining software updates and support.
